

Company Overview

Jaeka is committed to delivering exceptional outcomes in the most challenging environments. We understand the complexities of corporate landscapes and the need for solutions that balance innovation, efficiency, and cultural alignment. With this in mind, we collaborate closely with clients to formulate strategies that deliver the optimum return on investment.

Jaeka's core strength lies in technical excellence, achieved through inquisitiveness, perseverance and a commitment to continuous improvement.

Safety in design is a cornerstone of our approach. We define end-user requirements explicitly to ensure the safest and most effective solutions.

Our engineering services span the complete project lifecycle. We develop early concepts for business analysis, as well as the design phases that follow. Deliverables range from engineering deliverables, project deliverables including funding applications, construction tender packs and tender reviews. Furthermore, our services include construction project engineering as well as commissioning management and operational readiness.

We pride ourselves on agility. Artificial Intelligence is advancing rapidly and we are dedicated to leveraging these technologies to optimise processes and enhance results. By harnessing these powerful systems, we drive efficiency to deliver cost and time effectiveness. To ensure quality, we enforce rigorous reviews of all AI-generated content to guarantee accuracy and reliability.

Our greatest value proposition is simple: building long-term partnerships. It is our mission to develop deep relationships with clients, understand their needs intimately, and work together to deliver exceptional outcomes.

Send us your enquiry to discuss the possibilities.

We work closely with our clients to deliver a broad spectrum of services - from traditional engineering design to advanced AI-driven solutions and cloud systems administration. Over time, our business has evolved to build deep capabilities across both engineering and emerging technologies, including agentic AI and cloud computing.

Our Services

- Project Engineering (Capex/Opex)
- Order of Magnitude and Feasibility Studies
- Engineering Design
- Commissioning Management & Ops Readiness
- Systems Engineering
- Agentic AI and cloud services deployment

Technical excellence. Engineering beyond limits.
